TUTTA L'UMBRIA UNA MOSTRA

11.03—10.06.2018

THE EXHIBITION ORGANIZED IN 1907 REPROPOSED:
THE UMBRIAN ART BETWEEN THE MIDDLE AGE
AND THE RENAISSANCE

The exhibition, curated by Cristina Galassi and Marco Pierini, is inspired by the historical exhibition Mostra d'antica arte umbra organized in 1907. This new exhibition re-proposes the amazing wealth of art forms appeared in Umbria between the Middle Ages and the Renaissance. The new exhibition collects more than 100 pieces of the most important artists of this period coming from the entire regional territory: local museums, ecclesiastical institutions and private collections so that Umbria will really be an exhibition!

Masterpieces preserved in the Museum's storages

23.09.2018—06.01.2019

La Galleria Nazionale dell'Umbria preserves in his storage a huge amount of works of art from XIII to XX century. This works has been retained to preserve them, for continuity with museum pieces exposed or only because there wasn't enough space available in Palazzo dei Priori's rooms.

The exhibition has the goal to make people know some art pieces intended to be the most interesting and better maintained, from XIII to XVI century. The guest can expect two surprises: the extended museum tour and new discoveries.
